Variability factors of the appropriate methadone doses to reach stability
Facteurs de variabilité des doses de méthadone nécessaires pour atteindre l'équilibre

Funding country: France
Project starting year: 2008
Project ending year: 2013
Area(s) of research: Treatment responses, Mechanism of drug use and effects

Objectives:

Scientific discipline(s) involved: Neurosciences, Psychology, Pharmacology
Objectives (native):

APPROCHES PHENOTYPIQUE ET GENOTYPIQUE DES BIOMARQUEURS PHARMACOCINETIQUES ET PHARMACODYNAMIQUES ASSOCIES A CETTE VARIABILITE

Initial identified needs:
The variability of the doses of methadone to reach the balance in the substitution treatment is complex, multifactorial and still incompletely understood.

Initial identified needs (native):

Variabilité des doses de méthadone à l'équilibre du traitement de substitution qui est complexe, multifactorielle et encore incompletely comprise.

Performed by: ASSISTANCE PUBLIQUE - HOPITAUX DE PARIS
